PN WELCOME TO OUR SCHOOL

Venerable Master Chin Kung AM

Educational Philosophy

Master Chin Kung devoted his life to advocating the teachings of the Buddha and traditional Chinese culture. Such teachings on morality and virtues emphasize compassion, respect and wisdom. Furthermore, there is a strong focus on filial piety, fraternal love, loyalty, trustworthiness, benevolence, love, harmony and equality. Master believed that a life guided by these values will lead to a stable and harmonious world.

Master's teachings promoted the learning of traditional culture. He believed that learning should begin at a young age, thus building a strong foundation for a virtuous character. Master Chin Kung's aspiration to propagate this moral education concept reflects the ancient Chinese education system. This system educated the child as soon as they begin to walk and talk and continues until university.

Filial piety and respect for parents, teachers and elders was the foundation. The primary education focused on learning how to be a virtuous person. The six years of study taught children to be gentle, kind, respectful, thrifty and patient.

During secondary education, students learnt how to conduct themselves as they applied the principles taught in the first six years of study.

In tertiary education, teachings emphasized the importance of being a responsible, trustworthy and dependable citizen who lived a fulfilling and balanced life to bring peace to the world.
